RECENT PROJECTS & EXPERIENCE

TRADE / ER TRADING APP

MongoDB, Express, React, Node.js

Overview

- Trading app designed for Users to barter their items with other users and make deals. Features include real time messaging, interactive drag and drop menus, React animations.
- Built primarily using MERN stack. Authentication using JSON web tokens, real-time messaging using Socket.IO, images hosted with Amazon S3 buckets.

PLAYDOG PLAYDATE APP

Python Django, Leaflet.js

Overview

- Designing a CRUD application for users to post play dates for their dogs. Emphasis on a fun and friendly user experience. Built primarily with Python & Django.
- Main functionality includes making map API calls to reverse geocode user post locations. Making dog profiles. Attending/ creating playdate events.
- Additional front-end features built with Javascript, Esri Leaflet API, JQuery, FA icons, image hosting with Amazon S3 buckets.
