Professional Experience

Orium (Formerly MyPlanet) - *Software Engineer* (Jun 2022 - Present)

- Developed and implemented various components for E-commerce websites using a headless architecture and agile development methodology, resulting in improved user experience for hundreds of daily users. Utilized technologies such as Typescript, Next.js, and various API's to deliver high-quality solutions.
- Created reusable, intuitive components and comprehensive documentation to streamline the development process for the team, using tools such as Chakra UI and React. This increased the efficiency and productivity of the development team.

Sedin Technologies - *Full Stack Developer* (Feb 2022 - Jun 2022)

- Various full-stack development roles depending on the current demands of the project, relative to client needs. Working client-side, server-side, and or database-side, applying agile development principles and with a heavy emphasis on testing client-side components to ensure optimal performance and scalability.
- Technologies used include Next.js, React, PostgreSQL, Node, Express, Sequelize, Apollo, GraphQL, Jest/ React Testing Library and various UI frameworks

ServUs Health - *Full Stack Developer* (Jan 2021 - Jan 2022)

- Led and managed development, including UI/UX design, front-end feature implementation, API development, server-side development, and database design and management.
- Utilized a range of technologies and frameworks including React, Python/Flask, PostgreSQL, Google Cloud, AWS, and SCSS.
